

Tilley Solar Project Update

CS Tilley Solar GP Inc. ("Tilley Solar"), a subsidiary of Canadian Solar Inc., is developing the Tilley Solar Project. At Tilley Solar we believe in keeping our neighbors and stakeholders informed and up to date on our Projects. We are sending you this newsletter to provide an update on the Tilley Solar Project, located on the S 24-18-13 W4M and N 13-18-13 W4M, approximately 9 km northwest of the Hamlet of Tilley, as shown below.

Our stakeholder engagement efforts commenced in May 2016 and will be ongoing through the pre-construction, construction, and operation phases of the Project. The initial Alberta Utilities Commission (AUC) power plant approval was received for the project in March 2017. Since then, we have made minor amendments to our project plan, including equipment changes and a schedule update. We conducted the Participant Involvement Program in March 2019 and submitted a Letter of Enquiry (LOE) to gain approvals from the AUC. In January 2021, we received the AUC approvals, and the construction completion date has been extended to January 31, 2023. We will inform the public if there is any further LOEs to the AUC.

Interconnection Approval

In January 2021, Tilley Solar received the interconnection approval from the AUC that will enabling the project to connect to the FortisAlberta distribution grid.

Project Schedule

Tilley Solar would also like to provide stakeholders with an updated project schedule because of these changes. The updated project schedule is as follows:

Stakeholder Consultation	Ongoing
AUC Power Plant Approval Received	June 2017
AUC LOE Approval	January 2021
Interconnection Approval	Q1 2021
Construction	July 2021
In Service Date	Q1 2022
